REVIEWER INDEX

to Volume 139, January–April, 1995

Below is a list of the people who reviewed manuscripts for GENETICS during the preparation of Volume 139. The aim of GENETICS is to communicate significant research. To succeed, we must recognize what is significant, making sure the presentation is accurate, unambiguous and easily readable. For this, we depend heavily upon our reviewers, who perform this indispensable service without reward. The quality of the journal strongly reflects the quality of their efforts. We apologize to any reviewer whose name has been inadvertently omitted, and we are sincerely grateful to all.

SUBJECT INDEX

to Volume 139, January–April 1995

Adaptation, genetic adaptation to captivity in laboratory populations of *Drosophila melanogaster*, 255
Aedes aegypti, malaria parasite susceptibility in, RFLP mapping of QTLs for, 1711
Alleles
  change in frequency
    effects of selection in partial full-sib mating, 439
    estimation of effective size in populations with overlapping generations, 1077
  frequencies at microsatellite loci, population subdivision based on, 457
  Ser^{P} characterization, 203
Allozyme
  -associated heterosis in marine bivalves, 1719
  pattern variation in Atlantic cod, gene flow and, 375
Antibiotic resistance, vicious circles: looking back on resistance plasmids (*Perspectives*), 1465
Apis mellifera, linkage map, random amplified polymorphic DNA (RAPD) markers in, 1371
Arabidopsis thaliana, ethylene signal transduction in, 1393
Arabidopsis thaliana ecotype Columbia, ubiquitin genes, 921
Aspergillus nidulans
  developmental regulatory genes idenified by overexpression, 537
  nuclear migration, inhibition by *nudA* mutations, 1223
Avena barbata, California populations, evolution of ribosomal DNA genetic structure, 941

Bacteria, *Escherichia coli*. *See Escherichia coli*
Bacteriophage
  clustered exchanges by RecBCD pathway of *E. coli* phage lambda, 1107
  Cold Spring Harbor Phage Course (1945-1970): a 50th anniversary remembrance (*Perspectives*), 1101
  coliphage lambda DNA replication, host initiator function *dnaA* in, 1469
Bean, cytoplasmic male sterile (CMS) common bean, nuclear pollen fertility restorer (*Fr*) gene-directed mitochondrial DNA alteration in, 955
Behavior
  bottleneck effects on genetic variance for courtship repertoire, 365
  Mu transposons in maize, 1777
Bottlenecks, effects on genetic variance for courtship repertoire, 365
Breakpoints, chromosomal inversion breakpoints between *D. melanogaster* and *D. subobscura*, 321
Breeding
  forest trees, mapping QTLs in *Populus*, 963
  inbreeding depression in laboratory populations of *Drosophila melanogaster*, 255
  quantitative genetics of 4x-2x hybrid populations with first division restitution and second-division restitution $2n$ gametes produced by diploid parents, 1797

Caenorhabditis elegans
  cleavage spindle orientation in, role of *par-2* and *par-3* genes, 549
  clk-1 mutations, effects on developmental and behavioral timing, 1247
  dauer larva development and adult longevity, genes regulating, 1567
  dye-filling mutants, 171
  fog-3 and germ-cell fate in, 561
  gld-1 gene
    multiple functions in germline development, 607
    oocyte development and, 579
  let-23-mediated signaling in, *sli-1* (suppressor of lineage defect) regulation, 1553
  mutations in *unc-52* in, 159
  oocyte development in, *gld-1* gene and, 579
  unc-8 and *sup-40* regulation of ion channels in motoneurons, 1261
Cattle, mapping QTLs for milk production in dairy cattle, 907
Centromere
  function during meiosis in *Saccharomyces cerevisiae*, *cis*-acting determinants affecting, 1159
  gene-centromere mapping, polar body and oocyte typing in, 1091
Chemosensory function, dye-filling mutants in *Caenorhabditis elegans*, 171
Chiasma interference, counting model for, 1201
Chi-square model, statistical analysis of crossover interference, 1045
Chromatid interference, statistical analysis, 1057
Chromocenter, *Drosophila melanogaster* salivary gland, polytenized mitotic heterochromatin in, 659
Chromosomal inverted-repeat assay, homologous recombination pathways in *Saccharomyces cerevisiae*, 45
Chromosome(s)
  chromosomal inversion breakpoints between *D. melanogaster* and *D. subobscura*, 321
  Horka-induced nondisjunction, chromosome loss and genetic mosaics in *Drosophila melanogaster*, 1585
  mapping bristle QTLs in *Drosophila melanogaster*, 1273
  meiotic chromosome disjunction fidelity in *Saccharomyces cerevisiae*, conserved centromere DNA elements in, 1159
  meiotic pairing in triploid and tetraploid *Saccharomyces cerevisiae*, 1511

Circadian clock, effect of *clk-1* mutations in *Caenorhabditis elegans* on developmental and behavioral timing, 1247
Cleavage, role of *par-2* and *par-3* genes in cleavage spindle orientation in *Caenorhabditis elegans*, 549
Cloning
  cloning artifacts in databases (*letter*), 487
  complete set of marked yeast telomeres for cloning, 125
  Mothers against dpp (MAD) gene, 1347
Cold Spring Harbor Phage Course (1945-1970): a 50th anniversary remembrance (*Perspectives*), 1101
Competitive ability, genetic adaptation to captivity in laboratory populations of *Drosophila melanogaster*, 255
Cosmids, physical map of X chromosome of *Drosophila melanogaster*, 1631
Cotransformation, ectopic integration of transforming DNA among *Neurospora* transformants selected for gene replacement, 1533
Crossover interference, statistical analysis via chi-square model, 1045
Cytogenetics
  fifties and the renaissance in human and mammalian cytogenetics (*Perspectives*), 489
  tipE, 1679

Database contamination, poly(dC) segments and cloning artifacts in databases (*letter*), 487
Deletion, extragenic suppressors of hyper-deletion phenotype of *Saccharomyces cerevisiae hpr1*Δ mutation, 57
Diploidy, somatic mutations and, 1441
DNA
  conservative (two-progeny) DNA double-strand break repair, 5
  evolutionary analyses of DNA sequences subject to constraints on secondary structure, 1429
  mitochondrial
    complete nucleotide sequence of sea lamprey mitDNA, 873
    nuclear pollen fertility restorer (*Fr*) gene-directed mitochondrial DNA alteration in CMS bean, 955
  Mus spretus LINE-1 sequences in C57BL/6J mouse, 901
  random amplified polymorphic DNA (RAPD) markers, linkage map of honey bee, 1371
  ribosomal (rDNA), evolution in California populations of *Avena barbata*, 941
  space-time process model for evolution of DNA sequences, 993
  weak selection at "silent" sites in *Drosophila* DNA, 1067
DNA ploidy
  polyploidy and meiotic chromosome segregation in *Saccharomyces cerevisiae*, 1511
  somatic mutations and diploidy, 1441
DNA repair
  double-strand break repair
    conservative (two-progeny), 5
    modulation by *SRS2* and *RAD51*, 1189
  MRE11 and *RAD50* interaction in DNA repair and meiosis-specific double-strand break formation in *Saccharomyces cerevisiae*, 1521
Drosophila
  chromosomal inversion breakpoints between *D. melanogaster* and *D. subobscura*, 321
  genetic characterization of *small ovary (sov)* gene, 1309
  Ser^D characterization, 203
  white gene dosage compensation, 733
Drosophila melanogaster
  aberrant splicing and transcription termination by *P* element insertion into intron of *Drosophila* gene, 327
  cis-regulation of *Sex combs reduced (Scr)* gene, 781
  decapentaplegic (dpp) gene, expression in imaginal disk, 745
  embryonic peripheral nervous system development, *P*-element mutations and, 1663
  enhancer elements of *cut* locus, 1689
  flamenco control of *gypsy* transposition/infectivity in, 697
  genetic adaptation to captivity and inbreeding depression in laboratory populations, 255
  genetic enhancers of *decapentaplegic (dpp)* signaling pathway, 241
  genetic load in, 287
  HMPA-induced *vermilion* mutations, 649
  Horka-induced nondisjunction, chromosome loss and genetic mosaics in, 1585
  hybrid *P*-element activity in, 1601
  iab regulation of homeotic genes of bithorax complex, 835
  iab-5,6,7 transvection in, 815
  "male-lethal" insertions in *Sex-lethal (Sxl)* gene, 631
  mapping bristle QTLs in, 1273
  Mothers against dpp (MAD) gene, 1347
  mutation accumulation in *Drosophila*, 767
  mutations within 63E-64A genomic region, 1701
  myosin alkali light chain (*Mlc1*) gene, intron evolution, 299
  out at first (oaf) gene, 1331
  P-element-induced variation in metabolic regulation in, 337
  P-element insertions in cloned genes, inverse PCR screen for, 757
  Polycomb and *trithorax* group gene product regulation of *Sex combs reduced (Scr)*, 797
  polygenic mutations in, 1293
    causal relationship of bristle number to fitness, 861
    non-linear divergence among unselected strains, 849
  promotor elements in, 1359

rate of inbreeding depression in, 287
rates of *R1* and *R2* evolution, 685
regulation of *cubitus interruptus (ci)* expression in, 229
salivary gland chromocenter, polytenized mitotic heterochromatin in, 659
sex determination, genetic interactions with ovo^D, screen for new germline sex determination genes, 713
sexual differentiation in females, *intersex* gene function and action, 1649
sodium channel functional regulation, *tipE* cytogenetics and molecular localization, 1679
sperm displacement and accessory gland protein loci in, 189
su(Hw) transcriptional regulation of *gypsy* retrotransposon, 215
tandem repeats in *Hsr-omega* nuclear RNA, 1611
targets of homeotic genes, 349
transposase-induced gap repair in, inverted-repeat-binding protein in, protection of *P*-element termini, 1321
β2-tubulin structure and function in, 267
vertical transmission of *R1* and *R2* during evolution, 671
visual system function, mutations in *larval photokinesis A (lphA)* gene and, 1623
weak selection at "silent" sites in *Drosophila* DNA, 1067
wingless (wg) gene signaling activities, 309
X chromosome, physical map, 1631
Drosophila obscura, rates of *R1* and *R2* evolution, 685
Dynein, *Aspergillus nidulans*, extragenic suppressors, 1223

Effective population number, inbreeding effective population number in dioecious population, 473
Effective population size
populations under selection, 1013
populations with overlapping generations, temporal allele frequency change and, 1077
populations with separate sexes, 1007
Electrophoresis, early days of gel electrophoresis (*Perspectives*), 1
Embryogenesis
clk-1 mutations in *Caenorhabditis elegans*, effect on developmental and behavioral timing, 1247
Drosophila melanogaster, Sex combs reduced (Scr) transcription during, 781
peripheral nervous system development in *Drosophila melanogaster, P*-element mutations and, 1663
Environment
among-environment heteroscedasticity and genetic autocorrelation, 1815
genetics of competition in nature, 397
genotype-environment interactions in *E.coli*, 19
Enzymes, genes encoding peripheral and membrane arms of *Neurospora* mitochondrial complex I, 1211
Epistasis, contribution to genetic variance components, 1455
Escherichia coli
clustered exchanges by RecBCD pathway of *E. coli* phage lambda, 1107
coliphage lambda DNA replication, host initiator function *dnaA* in, 1469
conjugational recombination in, 1123
conservative (two-progeny) DNA double-strand break repair, 5
genotype-environment interactions, 19
recA polA mutants lethality in, 1483
transduction, restriction and recombination patterns in *E. coli*, 35
Ethylene, signal transduction in *Arabidopsis thaliana*, 1393
Evolution
Drosophila melanogaster, vertical transmission of *R1* and *R2* during, 671
genes encoding ubiquitin proteins in *Arabidopsis thaliana* ecotype Columbia, 921
molecular evolution of *Ac/Ds* transposable-element family in pearl millet and other grasses, 1411
ribosomal DNA in colonial California populations of *Avena barbata*, 941
space-time process model for evolution of DNA sequences, 993

Fertility, cytoplasmic male sterile (CMS) common bean, nuclear pollen fertility restorer (*Fr*) gene-directed mitochondrial DNA alteration in, 955
Fitness
allozyme-associated heterosis in marine bivalves, 1719
genotype-environment interactions in *E.coli*, 19
Fruitfly. *See Drosophila*
Fungus
Aspergillus. See Aspergillus nidulans
Neurospora. See Neurospora crassa

Gene
accessory gland protein (*Acp*), sperm displacement and accessory gland protein loci in *Drosophila melanogaster*, 189
complementary, speciation, 1805
cubitus interruptus (ci), expression in *Drosophila melanogaster*, 229
cut, structure and regulation, 1689
daf, dauer larva development and adult longevity in *Caenorhabditis elegans*, 1567
decapentaplegic (dpp)
expression in imaginal disk, 745
genetic enhancers of, 241
developmental regulatory genes in *Aspergillus nidulans*, 537
flamenco (flam), control of *gypsy* transposition/infectivity in *Drosophila melanogaster*, 697

fog-3, germ-cell fate in *Caenorhabditis elegans*, 561
Fr, nuclear pollen fertility restorer (*Fr*) gene-directed mitochondrial DNA alteration in CMS bean, 955
GCR1, analysis, 511
genes encoding peripheral and membrane arms of *Neurospora* mitochondrial complex I, 1211
gld-1
  multiple functions in *Caenorhabditis elegans* germline development, 607
  tumor suppressor gene required for oocyte development in *Caenorhabditis elegans*, 579
hepatocarcinogen-resistance (*Hcr*), in DBA/2 mice, 387
homeotic genes
  bithorax complex
    iab regulation, 835
    iab-5,6,7 transvection, 815
  cis-regulation of *Scr*, 781
  targets in *D. melanogaster*, 349
HRS genes, extragenic suppressors of hyper-deletion phenotype of *Saccharomyces cerevisiae hpr1*Δ mutation and, 57
insertional mutations in developmentally regulated mouse genes, gene-trap screen for, 889
intersex gene function and action, 1649
larval photokinesis A (lphA), *Drosophila melanogaster* visual system function and, 1623
Mothers against dpp (MAD) gene, genetic characterization and cloning, 1347
MRE11 and *RAD50* interaction in DNA repair and meiosis-specific double-strand break formation in *Saccharomyces cerevisiae*, 1521
mtr (methyltryptophan resistance), sexual-cycle-specific spontaneous mutations of *mtr* gene in *Neurospora crassa*, 137
mutations within 63E-64A genomic region of *Drosophila melanogaster*, 1701
myosin alkali light chain (*Mlc1*) gene, intron evolution in, 299
out at first (oaf) gene, regulatory autonomy and molecular characterization, 1331
Polycomb and *trithorax* group gene product regulation of *Scr*, 797
RAD52, inverted and direct DNA repeat recombination in *Saccharomyces cerevisiae*, 109
RAD52 epistasis group
  DNA double-strand break repair in *Saccharomyces cerevisiae*, modulation by *SRS2*, 1189
  homologous recombination pathways in *Saccharomyces cerevisiae*, 45
role of *par-2* and *par-3* genes in cleavage spindle orientation in *Caenorhabditis elegans*, 549
Rox1 repressor of hypoxic genes, auto-repression of, 1149
Saccharomyces cerevisiae mismatch repair genes, effect on recombination fidelity, 1175
Sex combs reduced (Scr)
  cis-regulation, 781
  Polycomb and *trithorax* group gene product regulation of, 797
Sex-lethal (Sxl) gene, "male-lethal" insertions, 631
SIS2 overexpression and gene expression in *sit4* mutants, 95
small ovary (sov), genetic characterization of, 1309
SPT7, in transcription, 523
su(Hw) (suppressor of Hairy-wing), transcriptional regulation of *Drosophila gypsy* retrotransposon, 215
temperature-induced paralysis locus E (tipE), sodium channel functional regulation in *Drosophila melanogaster*, 1679
ubiquitin genes of *Arabidopsis thaliana* ecotype Columbia, 921
unc-8 and *sup-40* regulation of ion channels in *Caenorhabditis elegans* motoneurons, 1261
unc-52 mutations in *Caenorhabditis elegans*, 159
vermilion, HMPA-induced mutations in *Drosophila melanogaster*, 649
white, dosage compensation, 733
wingless (wg) gene signaling activities, 309
Gene-centromere mapping, polar body and oocyte typing in, 1091
Gene duplication, 421
Gene flow, in Atlantic cod, RFLP and allozyme variation, 375
Gene replacement
  ectopic integration of transforming DNA among *Neurospora* transformants selected for gene replacement, 1533
  homologous gene replacement in *Physarum polycephalum*, 147
Genetic autocorrelation, 1815
Genetic distance, evaluation based on stepwise mutation model, 463
Genetic markers
  contribution to genetic variances and covariances among quantitative traits in random mating populations, 445
  meiotic instability of *Pythium sylvaticum*, 1233
Gene-trap screen, insertional mutations in developmentally regulated mouse genes, 889
Genome, sea lamprey mitochondrial genome, complete nucleotide sequence, 873
Genotype, genotype-environment interactions in *E.coli*, 19
Germline development
  in *Drosophila*, *small ovary (sov)* gene and, 1309
  fog-3 and germ-cell fate in *Caenorhabditis elegans*, 561
  gld-1 gene of *Caenorhabditis elegans*, 579
    multiple functions, 607
Glycolytic pathway, *Saccharomyces cerevisiae*, Gcr1p-Gcr2p complex, 511

Grasses
Ac/Ds transposable-element family in grasses, 1411
ribosomal DNA in colonial California populations of *Avena barbata*, 941
Growth and development
allozyme-associated heterosis in marine bivalves, 1719
dauer larva development and adult longevity in *Caenorhabditis elegans*, genes regulating, 1567
developmental regulatory genes in *Aspergillus nidulans*, 537
embryonic peripheral nervous system development in *Drosophila melanogaster*, *P*-element mutations and, 1663
interval mapping of *high growth (hg)* locus in mice, 1737
mapping QTLs in *Populus*, 963
sit4 mutants, *SIS2* overexpression and, 95
Gynodioecy
cytoplasmic variation in inheritance of male sterility in *Plantago coronopus*, 1749
nuclear (restorer) genetic variation in inheritance of male sterility in *Plantago coronopus*, 1759

Heterochromatin, polytenized mitotic heterochromatin in *Drosophila* salivary gland chromocenter, 659
Heteroscedasticity, among-environment, 1815
Heterosis, allozyme-associated, in marine bivalves, 1719
Hexamethylphosphoramide (HMPA), genotoxicity in postmeiotic germ cells of *Drosophila*, 649
Hybrids
deer interspecies hybrids between Père David's deer and red deer as new gene mapping resource, 1383
population genetics of speciation, evolution of hybrid incompatibilities, 1805
quantitative genetics of 4x-2x hybrid populations with first division restitution and second-division restitution 2*n* gametes produced by diploid parents, 1797

Identity by descent, in island-mainland populations, 429
Inbreeding
effects of selection in partial full-sib mating, 439
inbreeding depression in laboratory populations of *Drosophila melanogaster*, 255
inbreeding effective population number in dioecious population, 473
rate of inbreeding depression in *Drosophila melanogaster*, 287
Interference
chiasma, counting model for, 1201
chromatid, statistical analysis, 1057
crossover, statistical analysis via chi-square model, 1045
estimating interference and linkage map distance from two-factor tetrad data, 1449
modeling interference in genetic recombination, 1031
Intron, intron evolution in myosin alkali light chain (*Mlc1*) gene of *D. melanogaster*, 299
Inverted-repeat-binding protein, in transposase-induced gap repair in *Drosophila*, protection of *P*-element termini, 1321
Ion channels, *unc-8* and *sup-40* regulation of ion channels in *Caenorhabditis elegans* motoneurons, 1261

Karyotype analysis, meiotic instability of *Pythium sylvaticum*, 1233

Least-squares estimate, origin of sporophytic self-incompatibility, 975
Liver cancer, hepatocarcinogen-resistance (*Hcr*) genes in DBA/2 mice, 387

Maize
germinal transposition of maize element *Dissociation (Ds)* in tomato, 407
Mutator system, behavior and regulation of *Mu* transposons, 1777
Mapping
complete set of marked yeast telomeres for physical mapping, 125
deer interspecies hybrids, 1383
estimating interference and linkage map distance from two-factor tetrad data, 1449
gene-centromere mapping, polar body and oocyte typing in, 1091
half-tetrad analysis for mapping *ros* mutation in zebrafish, 1727
interval mapping of *high growth (hg)* locus in mice, 1737
linkage map of honey bee, random amplified polymorphic DNA (RAPD) markers in, 1371
physical map of X chromosome of *Drosophila melanogaster*, 1631
quantitative trait loci
bristle QTLs in *Drosophila melanogaster*, 1273
nonparametric approach, 1421
in *Populus* (forest trees), 963
QTLs for milk production in dairy cattle, 907
RFLP mapping of QTLs for malaria parasite susceptibility in *Aedes aegypti*, 1711
Mating behavior, bottleneck effects on genetic variance for courtship repertoire, 365
Meiosis
chromosome pairing in triploid and tetraploid *Saccharomyces cerevisiae*, 1511
meiotic instability of *Pythium sylvaticum*, 1233
Saccharomyces cerevisiae, meiotic segregation determinants in *Saccharomyces cervisiae*, 1159
Metabolism, *Drosophila melanogaster*
mutation accumulation in, 767
P-element-induced variation in metabolic regulation, 337

Mice
insertional mutations in developmentally regulated genes, gene-trap screen for, 889
interval mapping of *high growth (hg)* locus in mice, 1737
liver tumor resistance in, 387
Mus spretus LINE-1 sequences in C57BL/6J mouse, 901
Microsatellites
allele frequencies at, population subdivision based on, 457
genetic distance based on stepwise mutation model, 463
Microtubules, β2-tubulin structure and function in *Drosophila melanogaster*, 267
Mitochondria
genes encoding peripheral and membrane arms of *Neurospora* mitochondrial complex I, 1211
nuclear pollen fertility restorer (*Fr*) gene-directed mitochondrial DNA alteration in CMS bean, 955
sea lamprey mitochondrial DNA, complete nucleotide sequence, 873
Models/modeling
counting model for chiasma interference, 1201
estimating interference and linkage map distance from two-factor tetrad data, 1449
evolutionary analyses of DNA sequences subject to constraints on secondary structure, 1429
genetic distance based on stepwise mutation model, 463
modeling interference in genetic recombination, 1031
quantitative genetics of 4x-2x hybrid populations with first division restitution and second-division restitution 2*n* gametes produced by diploid parents, 1797
space-time process model for evolution of DNA sequences, 993
Mosquito, malaria parasite susceptibility in, RFLP mapping of QTLs for, 1711
Motoneurons, *unc-8* and *sup-40* regulation of ion channels in *Caenorhabditis elegans* motoneurons, 1261
Mutagenesis, aberrant splicing and transcription termination by *P* element insertion into intron of *Drosophila* gene, 327
Mutants
dye-filling mutants in *Caenorhabditis elegans*, 171
sep1, meiotic recombination in, 495
sit4 mutants, *SIS2* overexpression and gene expression in, 95
spt7, transcription in, 523
Mutation
clk-1 mutations in *Caenorhabditis elegans*, effect on developmental and behavioral timing, 1247
in 63E-64A genomic region of *Drosophila melanogaster*, 1701
gld-1 gene of *Caenorhabditis elegans*, 579
HMPA-induced *vermilion* mutations in *Drosophila melanogaster*, 649
Horka-induced nondisjunction, chromosome loss and genetic mosaics in *Drosophila melanogaster*, 1585
insertional, in developmentally regulated mouse genes, gene-trap screen, 889
larval photokinesis A (lphA) gene, *Drosophila melanogaster* visual system function and, 1623
lexA(Def), *recA polA* lethality in *E. coli*, 1483
mutation accumulation in *Drosophila*, 767
mutations affecting donor preference during mating type interconversion in *Saccharomyces cerevisiae*, 1495
nudA, extragenic suppressors, 1223
P-element, embryonic peripheral nervous system development in *Drosophila melanogaster*, 1663
P-element-induced variation in metabolic regulation in *Drosophila melanogaster*, 337
polygenic mutations in *Drosophila melanogaster*, 1293
causal relationship of bristle number to fitness, 861
non-linear divergence among unselected strains, 849
ros, mapping in zebrafish, 1727
Saccharomyces cerevisiae hpr1Δ mutation, extragenic suppressors of hyper-deletion phenotype of, 57
Ser^{D} characterization, 203
sexual-cycle-specific spontaneous mutations of *mtr* (methyltryptophan resistance) gene in *Neurospora crassa*, 137
sli-1 (suppressor of lineage defect) locus, *let-23*-mediated signaling in *Caenorhabditis elegans*, 1553
somatic mutations and diploidy, 1441
β2-tubulin isoform in *Drosophila melanogaster*, 267
unc-52 mutations in *Caenorhabditis elegans*, 159
Myofilament, assembly, mutations in *unc-52* in *Caenorhabditis elegans* and, 159

Nematode, *Caenorhabditis elegans*. *See Caenorhabditis elegans*
Nemophila menziesii, quantitative genetics of response to competitors, 397
Nervous system, peripheral, development in *Drosophila melanogaster*, *P*-element mutations and, 1663
Neurospora crassa
ectopic integration of transforming DNA among *Neurospora* transformants selected for gene replacement, 1533
genes encoding peripheral and membrane arms of mitochondrial complex I, inactivation of, 1211
sexual-cycle-specific spontaneous mutations of *mtr* (methyltryptophan resistance) gene in, 137
transformation, nuclear competence, 1545

Oocyte development, *Caenorhabditis elegans*, *gld-1* gene and, 579
Osmoregulation, *unc-8* and *sup-40* regulation of ion channels in *Caenorhabditis elegans* motoneurons, 1261

Ovary, development in *Drosophila, small ovary (sov)* gene and, 1309

Paternal effect, *Horka*-induced chromosome loss and genetic mosaics in *Drosophila melanogaster*, 1585
P-element
  aberrant splicing and transcription termination by *P*-element insertion into intron of *Drosophila* gene, 327
  hybrid *P*-element activity in *Drosophila melanogaster*, 1601
  -induced variation in metabolic regulation in *Drosophila melanogaster*, 337
  mutations, embryonic peripheral nervous system development in *Drosophila melanogaster*, 1663
  P-element insertions in cloned genes of *Drosophila melanogaster*, inverse PCR screen for, 757
  transposition, transposase-induced gap repair in *Drosophila*, inverted-repeat-binding protein in, 1321
Perspectives
  Cold Spring Harbor Phage Course (1945-1970): a 50th anniversary remembrance, 1101
  early days of gel electrophoresis, 1
  fifties and the renaissance in human and mammalian cytogenetics, 489
  vicious circles: looking back on resistance plasmids, 1465
Petromyzon marinus, mitochondrial DNA, complete nucleotide sequence, 873
Phenotype, hyper-deletion phenotype of *Saccharomyces cerevisiae hpr1*Δ mutation, extragenic suppressors of, 57
Physarum polycephalum, homologous gene replacement in, 147
Plantago coronopus, inheritance of male sterility in
  cytoplasmic variation, 1749
  nuclear (restorer) genetic variation, 1759
Plasmids, vicious circles: looking back on resistance plasmids (*Perspectives*), 1465
Plasmodium gallinaceum, susceptibility of *Aedes aegypti* to, RFLP mapping of QTLs for, 1711
Plasticity, among-environment heteroscedasticity and genetic autocorrelation, 1815
Polar body and oocyte typing, in gene-centromere mapping, 1091
Polymerase chain reaction (PCR), inverse, *P*-element insertions in cloned genes of *Drosophila melanogaster*, 757
Polymorphism
  restriction fragment length. *See* Restriction fragment length polymorphism
  weak selection at "silent" sites in *Drosophila* DNA, 1067
Polyploidy, effect on meiotic chromosome segregation in *Saccharomyces cerevisiae*, 1511
Population
  dioecious, inbreeding effective population number, 473
  effective population size
    populations under selection, 1013
    populations with overlapping generations, temporal allele frequency change and, 1077
    populations with separate sexes, 1007
  genetic population structure and gene flow in Atlantic cod, RFLP and allozyme variation, 375
  identity by descent in island-mainland populations, 429
  population genetics of speciation, evolution of hybrid incompatibilities, 1805
  population subdivision based on microsatellite allele frequencies, 457
Progeny testing, mapping QTLs for milk production in dairy cattle, 907
Promotors, promotor elements in *Drosophila melanogaster*, 1359
Pseudogene, 421
Pythium sylvaticum, meiotic instability of, 1233

QTL. *See* Quantitative trait loci
Quantitative genetics
  bottleneck effects on genetic variance for courtship repertoire, 365
  mutation accumulation in *Drosophila*, 767
  response to competitors in *Nemophila menziesii*, 397
  4x-2x hybrid populations with first division restitution and second-division restitution $2n$ gametes produced by diploid parents, 1797
Quantitative trait loci (QTL)
  contribution to genetic variances and covariances among quantitative traits in random mating populations, 445
  mapping, nonparametric approach, 1421
  mapping bristle QTLs in *Drosophila melanogaster*, 1273
  mapping QTLs for milk production in dairy cattle, 907
  mapping QTLs in *Populus*, 963
  RFLP mapping of QTLs for malaria parasite susceptibility in *Aedes aegypti*, 1711

Random amplified polymorphic DNA (RAPD) markers, linkage map of honey bee, 1371
Reciprocality, clustered exchanges by RecBCD pathway of *E. coli* phage lambda, 1107
Recombination
  clustered exchanges by RecBCD pathway of *E. coli* phage lambda, 1107
  conjugational recombination in *E. coli*, 1123
  conservative (two-progeny) DNA double-strand break repair, 5
  homologous recombination pathways in *Saccharomyces cerevisiae*, 45
  inverted and direct DNA repeat recombination in *Saccharomyces cerevisiae, RAD* genes in, 109

meiotic, *MRE11* and *RAD50* interaction in DNA repair and meiosis-specific double-strand break formation in *Saccharomyces cerevisiae*, 1521
meiotic recombination in *sep1* mutant, 495
mismatch repair and homeologous recombination in *Saccharomyces cerevisiae*, 1175
modeling interference in genetic recombination, 1031
modulation of *Saccharomyces cerevisiae* DNA double-strand break repair by *SRS2* and *RAD51*, 1189
P-element-induced male recombination in *Drosophila melanogaster*, 1601
reciprocal, during meiosis in *Saccharomyces cerevisiae*, *cis*-acting determinants affecting, 1159
transduction, restriction and recombination patterns in *E. coli*, 35
Replication
coliphage lambda DNA replication, host initiator function *dnaA* in, 1469
in *recA polA* mutants, 1483
Reproductive fitness
inbreeding depression in laboratory populations of *Drosophila melanogaster*, 255
rate of inbreeding depression in *Drosophila melanogaster*, 287
Restriction, transduction, restriction and recombination patterns in *E. coli*, 35
Restriction fragment length polymorphism
genetic population structure and gene flow in Atlantic cod, 375
mapping QTLs for malaria parasite susceptibility in *Aedes aegypti*, 1711
Retrotransposable elements
rates of *R1* and *R2* evolution, 685
vertical transmission of *R1* and *R2* during evolution of *Drosophila melanogaster*, 671
Retrotransposon
gypsy, *su(Hw)* transcriptional regulation of, 215
timing of Ty*3* transposition in mating yeast populations, 81
Retrovirus, *gypsy* transposition/infectivity in *Drosophila melanogaster*, *flamenco* control of, 697
RFLP. *See* Restriction fragment length polymorphism
RNA, nuclear, tandem repeats in *Drosophila melanogaster Hsr-omega* nuclear RNA, 1611

Saccharomyces cerevisiae
complete set of marked yeast telomeres for physical mapping and cloning, 125
DNA double-strand break repair, modulation by *SRS2* and *RAD51*, 1189
extragenic suppressors of hyper-deletion phenotype of *Saccharomyces cerevisiae hpr1*Δ mutation, 57
Gcr1p-Gcr2p complex, 511
homologous recombination pathways in, 45
inverted and direct DNA repeat recombination in, *RAD* genes in, 109
meiosis, centromere function, sister-chromatid cohesion, and reciprocal recombination during, 1159
meiotic chromosome pairing in triploid and tetraploid *Saccharomyces cerevisiae*, 1511
meiotic recombination in *sep1* mutant, 495
mismatch repair and homeologous recombination in, 1175
MRE11 and *RAD50* interaction in DNA repair and meiosis-specific double-strand break formation in, 1521
mutations affecting donor preference during mating type interconversion, 1495
Rox1 repressor of hypoxic genes, auto-repression of, 1149
SIS2 overexpression and gene expression in *sit4* mutants, 95
SPT7 gene in transcription, 523
test of a counting model for chiasma interference, 1201
timing of Ty*3* transposition, 81
Sea lamprey, mitochondrial DNA, complete nucleotide sequence, 873
Selection
effective population size, populations under selection, 1013
effects of selection in partial full-sib mating, 439
weak selection at "silent" sites in *Drosophila* DNA, 1067
Self-incompatibility, sporophytic, origin of, 975
Sequence analysis
evolutionary analyses of DNA sequences subject to constraints on secondary structure, 1429
promotor elements in *Drosophila melanogaster*, 1359
Sequence databases, poly(dC) segments and cloning artifacts in databases (*letter*), 487
Sequence tagged sites, physical map of X chromosome of *Drosophila melanogaster*, 1631
Sex determination
Drosophila melanogaster
genetic interactions with *ovo*^{D}, screen for new germline sex determination genes, 713
"male-lethal" insertions in *Sex-lethal (Sxl)* gene, 631
fog-3 and germ-cell fate in *Caenorhabditis elegans*, 561
gld-1 gene of *Caenorhabditis elegans*, 579
Sexual differentiation, *Drosophila melanogaster* females, *intersex* gene function and action, 1649
Signal transduction
decapentaplegic (dpp) signaling pathway in *Drosophila*, 241
Drosophila wingless gene signaling activities, 309
ethylene signal transduction in *Arabidopsis thaliana*, 1393
let-23-mediated signaling in *Caenorhabditis elegans*, *sli-1* (suppressor of lineage defect) regulation, 1553
Mothers against dpp (MAD) gene in *Drosophila melanogaster*, 1347
Sister-chromatid cohesion, during meiosis in *Saccharo-*

myces cerevisiae, cis-acting determinants affecting, 1159
Size, effective. *See* Effective population size
Sodium channels, in *Drosophila melanogaster*, temperature-sensitive paralytic mutations affecting, *tipE* cytogenetics and molecular localization, 1679
Space-time model, for evolution of DNA sequences, 993
Speciation, population genetics, evolution of hybrid incompatibilities, 1805
Spermatogenesis
fog-3 and germ-cell fate in *Caenorhabditis elegans*, 561
β2-tubulin structure and function in *Drosophila melanogaster*, 267
Sperm displacement, in *Drosophila melanogaster*, accessory gland protein loci and, 189
Spisula ovalis, allozyme-associated heterosis in, 1719
Sporophytic self-incompatibility, origin of, 975
Stem regions, evolutionary models for, 1429
Stepwise mutation model, genetic distance, 463
Sterility, male, inheritance in *Plantago coronopus*
cytoplasmic variation, 1749
nuclear (restorer) genetic variation, 1759
Synaptonemal complex (sc) formation, in triploid and tetraploid *Saccharomyces cerevisiae*, 1511

Telomere, complete set of marked yeast telomeres for physical mapping and cloning, 125
Telomere position effect, yeast telomere-specific factor, 67
Temperature, -sensitive paralytic mutations affecting sodium channel function in *Drosophila melanogaster, tipE* cytogenetics and molecular localization, 1679
Tetrad analysis, half-tetrad analysis for mapping *ros* mutation in zebrafish, 1727
Transcription
aberrant splicing and transcription termination by *P* element insertion into intron of *Drosophila* gene, 327
gypsy, su(Hw) regulation of, 215
Sex combs reduced (Scr) transcription during *Drosophila* embryogenesis, 781
SPT7 gene in, 523
telomere position effect, yeast telomere-specific factor, 67
Ty*3*, in mating yeast populations, 81
Transduction, transduction, restriction and recombination patterns in *E. coli*, 35
Transformation
ectopic integration of transforming DNA among *Neurospora* transformants selected for gene replacement, 1533
Neurospora crassa, nuclear competence, 1545
Transforming growth factor-β, genetic enhancers of *decapentaplegic (dpp)* signaling pathway in *Drosophila*, 241
Transposable element
Ac/Ds transposable-element family in grasses, 1411
P element. *See P* element
vertical transmission of *R1* and *R2* during evolution of *Drosophila melanogaster*, 671
Transposition
germinal transposition of maize element *Dissociation (Ds)* in tomato, 407
gypsy transposition/infectivity in *Drosophila melanogaster, flamenco* control of, 697
P-element, transposase-induced gap repair in *Drosophila*, inverted-repeat-binding protein in, 1321
timing of Ty*3* transposition in mating yeast populations, 81
Transposons. *See also* Transposable elements
behavior and regulation of *Mu* transposons in maize, 1777
germinal transposition of maize element *Dissociation (Ds)* in tomato, 407
Transvection, *iab-5,6,7* transvection in *Drosophila*, 815
Tree, mapping QTLs in *Populus*, 963
β2-Tubulin, structure and function in *Drosophila melanogaster*, 267

Ubiquitin proteins, in *Arabidopsis thaliana* ecotype Columbia, genes encoding, 921

Visual system, *Drosophila melanogaster*, mutations in *larval photokinesis A (lphA)* gene and, 1623
Vulval induction, *let-23*-mediated signaling in *Caenorhabditis elegans, sli-1* (suppressor of lineage defect) regulation, 1553

Weight gain, interval mapping of *high growth (hg)* locus in mice, 1737

X chromosome
Drosophila melanogaster, physical map, 1631
Drosophila white gene dosage compensation, 733

Yeast
Saccharomyces cerevisiae. See Saccharomyces cerevisiae
telomere-specific factor, 67
timing of Ty*3* transposition in mating yeast populations, 81

Zebrafish, half-tetrad analysis, mapping *ros* mutation and centromere of linkage group I, 1727
